主题

Good morning, ladies and gentlemen. I'm Zoey Wan. Thank you very much for giving me the chance to introduce our company TechKing and our services.

公司简介

I will briefly introduce our company and then describe how we work. TechKing is a leading application design and development company that can map your business for a comprehensive app solution. We serve a broad segment of international clients. Our projects in the European Union, the U.S.A. and other countries have earned us a good reputation and we are known globally to be one of the top mobile app development companies. We are especially known for developing online shopping apps. And er... our real-time delivery tracking, 24*7 support services ensure our apps shine out in the Android and iOS app stores.

服务种类

Now I will outline how we are able to help you. As our clients, you have two choices. If you want to save time and cost, you can choose one of our ready-made solutions that are already working for many supermarkets and grocery stores. However, if you have special requirements or ideas, we also offer elite on-demand customer services. Just let us know your requirements by completing our form. Our analysts will study your requirements and business with respect to your geographical market and develop a plan. Our developers will translate the plan into an app which we will deliver to you for trial. Then we will adjust the app according to your feedback.

开发费用和时间

Lastly, let's talk about the cost and time for development. We offer competitive prices but the cost will depend upon the features you wish to integrate into your app. The more features, the higher the cost, of course. Er... regarding time, it will differ based on the features and technology required since the development process will vary according to the complexity at the back end and the front end.

Thank you very much. If anyone has any questions, I'd be happy to answer them.

The bar graph shows the quarterly renewable energy capacity gains, in gigawatt, in China, US, Europe, and other regions between 2019 and 2020. Overall, the world's renewable energy capacity increased at a steady pace during the period, with particularly strong growth in Q4 in both years and the most notable growth contribution from China. 概括总体特征

The world's total capacity added slightly over 40 gigawatts through the first three quarters in both years, except in 2020Q1 when the addition was only 30 gigawatts. The fourth quarter of both years experienced very strong growth, adding nearly 70 gigawatts in 2019Q4, and 140 gigawatts in 2020Q4, which were almost twice and over three times as much as the regular quarterly addition respectively. 描述具体信息

比较、描述细节

Similarly, the US added about 5 gigawatts through the first three quarters in both years, tripling in 2019Q4 and quadrupling in 2020Q4, while Europe gained nearly 10 gigawatts through all quarters with a considerable gain of over 15 gigawatts in the last quarter of 2020.

It can be easily seen that China's capacity gains had been a significant contributor to the world's total capacity gains through the first three quarters in 2019, China's capacity added half of the world's total addition; in 2020, China's capacity addition climbed from 30 gigawatts in Q3 and then surged to 90 gigawatts in Q4, contributing to over 60% of the world's

作答样例

提案背景

I've noticed that many employees of our company have some complaints about their drowsiness basically because of the work stress and the overtime work at night they can not sleep very well. Also, long commutes to work, the corporate culture of "always on" and sedentary work style make them easy to get sleepy and depression of work efficiency on the afternoon. Therefore, as I'm concerned, some nap rooms to build up seems necessary.

调查分析

原因分析

Based on the need, I make a brief investigation of employees attitudes toward nap rooms. Since our company enjoys an international environment, with 42% Chinese, 40% American, 11% Canadian, and 7% Indian, I took the potential diversity into consideration. 90% Chinese and 82% Indian turn out to find nap rooms necessary, while nearly half American and Canadian find it necessary and half unnecessary. In a conclusion, almost 70% of our employees think that nap rooms are needed and Asian employees have significantly more demand in nap rooms.

I think we can transform some small meeting rooms into nap rooms in a certain facilities, like sofas, folding beds and blankets. And out of the "nap time", the nap room there are several rooms that are not sufficiently used and are stuffed with old equipment storage rooms. It would be a good choice to clear out the useless equipment and rooms can help our employees better rest and better work. I would appreciate it greatly.

提案结论

1. **内容:** 要点全覆盖, 细节合理细致。
2. **结构:** 条理清晰, 观点与细节之间支撑关系好; 行文流畅, 衔接自然 (连接词的使用: also, therefore, since, in a conclusion, or 等)。
